

API Documentation: File Extract API

Endpoint:

POST /api/files/extract

Description:

This API receives uploaded files (GST, PAN, Cheque, and COI), extracts relevant company data from them using OCR or other methods, and returns both the extracted data and metadata related to the uploaded files.

Request Payload (Multipart Form Data):

Field Name	Type	Description
gstFile	file	GST document file
PANFile	file	PAN card file
ChequeFile	file	Cancelled cheque file
coiFile	file	Certificate of Incorporation
userId	number	User ID to whom files belong

Response:

Status Code: 200 OK
